### **DETAILED ACTION**

Page 2

#### Election/Restrictions

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(q)). In this case:

Invention I – claims 1-15 & 23-25 is an apparatus directed to class 62/457.2

Invention II – Claims 16-22 is a process & method of making and directed to class 264/ 2.5.

The process of making as claimed can be made by a materially different apparatus such as a molding an insulated plastic storage bin.

Applicant elected without traverse during telephonic conversation and elected Invention I on 9/01/2006.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3744

Claims 1,2,3,9,12, 23 & 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slaughter (US Patent No. 4,981,234) in view of Huang et al (US 2002/0020790 A1). Slaughter disclose a food container for maintaining food at a reduced temperature and cavity is filled with a gelatinous material and comprising: a container (C) with inner shell/food receptacle (10) surrounding an outer shell (11), a hermetically sealed cavity filled with gelatinous material (30), an insulating material of closed-cell plastic form and further discloses a rib/ledge joining portion (see figure 3). Slaughter lacks to mention ultrasonic bonding means, however Huang et al, teaches ultrasonic bonding. It would have been obvious to one of ordinary skill in the prior art at the time of the claimed invention to utilize the teaching of Huang et al for modifying the disclosed invention of Slaughter for adequately securing the inner an outer containers.

### Allowable Subject Matter

Claims 4-8,10,11,13-15 & 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Jones whose telephone number is (571)272-4810. The examiner can normally be reached on Monday- Wednesday & Friday.

Art Unit: 3744

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
